May 30, 2014

Dear Jim,

Please accept this letter of support for the Bean Creek Restoration Project application for the Future Fisheries Improvement Program. The Matador Cattle Company has the grazing lease on both sides of Bean Creek on the Dennis property. On the north side of Bean Creek we pasture cattle every third year and a on the south side every year. To support this restoration project we agree to maintain a riparian fence and stock water gap or tank that will be installed as part of the project. The Matador Cattle Company is supportive of the collaborative conservation efforts with Montana Fish, Wildlife & Parks and the US Fish and Wildlife Service on working landscapes that have proven very successful in the Centennial valley.

Sincerely,

A handwritten signature in black ink, appearing to read 'Kyle Hardin'.

Kyle Hardin
