

Grizzly bear bites on the head and still alive.

Calf skull of grizzly bear depredation.

Both the calf and ewe are still alive after the grizzly bear attack. Calf was doctored, ewe was not.

Challenges with weather for Electric fences, and relocation and responding.

Bears pushed through electric fence that was working. Snow making fences less effective

Only a blood trail from where the calf was alive the night before. How do you capture the bear without anything for it to come back to, when only injured or this? Access
