FishMT----------36

Introduction

Anglers,

Welcome to Northeast Montana! When most anglers think about the fishing opportunities available in Northeast Montana the first thing that comes to mind is our large reservoirs such as Fort Peck, Nelson and Fresno. Those three reservoirs encompass the majority of our angling pressure, with anglers targeting traditional game fish like walleye, northern pike, yellow perch, lake trout and salmon. In addition to our larger reservoirs, the Missouri and Milk rivers offer unique opportunities for paddlefish, sauger and trophy channel catfish. What might be overlooked are the smaller ponds found throughout Northeast Montana.

Numerous public and private ponds are scattered throughout the arid landscape and Montana Fish, Wildlife and Parks (FWP) manages many of these ponds for recreational fishing. A variety of species are managed, including but not necessarily limited to yellow perch, crappie, largemouth bass, northern pike, and prairie stocked rainbow trout. These ponds vary greatly in size and accessibility, although all have the potential to create excellent fishing opportunities.

This guide is designed to let you know of ponds in your area that are managed by FWP. In here, you will find directions, species present and current management practices including fish stocking.

We have also made all our fisheries data available to you through "FishMT" online by clicking http://fwp.mt.gov/fish/. There you can find data, reports, fishing opportunities, fish distribution, Fishing Access Sites, fish stocking information, contact information, and much more. Most of the data are available through an easy to use interactive map (click the "Explore" tile), and the other tiles take you to even more resources. These data are available because they connect, in real time, to our internal database. So, as we conduct more surveys, and enter those data, they are available to you immediately. We now have tens's of thousands of fisheries surveys, millions of fish records, information on thousands of waterbodies, and more, all available to you online. We are also working on other improvements like fish tag reporting and an interactive database for fishing regulations.

Another tool for anglers is our recently released app that is a field guide to the Fishes of Montana. This app is free to download and is available in all the app stores. Once you download it you don't need any internet connectivity to learn about all of Montana's interesting fish and identify your catch. This app is an update to FWP's Field Guide to Montana fishes and the "Fishes of Montana" book. We developed this app in cooperation with Montana State University and High Country Apps and it is really easy to use and informative. It is the most up to date source for fish information in Montana.

Ponds need to have good water quality, favorable aquatic habitat, and proper management to develop and maintain desirable fish populations. They must also have adequate water depths to prevent excessive growth of aquatic vegetation and to support aquatic life during periods of adverse environmental conditions. The ponds in northeast Montana are extremely dynamic due to the nature of the prairie. Winter kills, varying water conditions, and summer heat can all play a part into the quality of the fishing pond. Our staff is committed to managing the ponds in the region, which includes routine sampling and often stocking of game fish. However, due to the size of the area and limited staff, we can benefit from you in letting us know what you are seeing on the landscape and how the fishing is.

Fish Kills

When a reservoir is first constructed, it is generally deep and productive; however, as small ponds and reservoirs age, they accumulate sediment and decaying vegetation.

Most of the dissolved oxygen (D.O.) in a pond is a product of plant photosynthesis. Oxygen can also enter the pond by absorption through the water surface, especially when there is wind and wave action. Dissolved oxygen can vary significantly throughout the year or even the day. Critically low D.O. levels can result from certain combinations of environmental conditions and pond characteristics. Low D.O. is the most common cause of fish kills, often occurring in summer, winter, or as a result of seasonal water column turnover.

Summer fish kills can result in the total or partial die-off of a pond's fish community. This type of fish kill is the most common in shallow heavily vegetated ponds containing large amounts of decomposing organic material. Excessive vegetative growth, especially algae, in a pond can lead to a fish kill. Sunny conditions result in a long period of plant photosynthesis that produces high D.O. levels during the late afternoon. However, during the night, oxygen is used for respiration by plants, fish, insects, and organic decomposition. If oxygen produced during the day is insufficient to carry all pond life through the night, a fish kill will result. Several consecutive calm cloudy days can result in vegetation dying and decomposing, reducing the pond's D.O. to the point where fish may not survive the night.

Winter fish kills result when oxygen levels fall too low to support fish under the ice. Since ice acts as a seal and prevents absorption of oxygen directly from the atmosphere, oxygen produced by plant photosynthesis is crucial. Thick cloudy ice or ice blanketed with snow allows very little sunlight penetration, so plants are unable to produce a sufficient amount of oxygen. Oxygen levels drop due to plant decomposition and respiration by various aquatic organisms. If snow cover persists for an extended period of time, the oxygen will be completely depleted, resulting in a fish kill. This usually happens in shallow ponds with large amount of organic matter such as decaying aquatic vegetation or livestock waste. Often, bullheads and carp are the only fish to survive.

To reduce the effects of winter and summer kills of fish on some of these shallower ponds, FWP uses windmill aerators. The aerator pumps air through a hose into an aerating stone located in the deepest part of the pond. As the air passes through the stone it creates bubbles that rise to the surface and circulates the pond water to increase oxygen levels and helps lower temperatures during the summer months.

Fish, Wildlife & Parks currently maintains over 20 windmill aerators throughout Region 6, and We encourage anglers to contact FWP if you suspect a windmill may be broken or not functioning properly. **Attention Anglers: Please use extra caution when ice fishing on a pond with a windmill aerator as there may be thin ice in some areas.**

Why Trout?

Often, we are asked "why do we stock so many ponds with trout instead of perch and bluegill?" There are several reasons, but the main reason is that it takes several years for a perch or a bluegill to survive before they would even be big enough to make it to someone's dinner plate. Many of these ponds are on the verge of having a fish kill of some sort, in any given year. If you must wait 2,3, or even 4 years to have fish of desirable size, chances are there will be environmental conditions in these shallow ponds that will result in a fish kill. Rainbow trout can reach 15 inches in a pond environment in one year. If they are fortunate enough to make it through at least one winter, you'll have quite a tussle on the other end of your line.

Clean. Drain. Dry.

CLEAN. Completely remove all mud, water, and vegetation before leaving the access area.

- Inspect your boat, trailer, and all gear. Pay attention to crevices and hidden areas.
- Remove all vegetation (by hand or sprayer).
- Remove all mud (use a pressurized power sprayer, found at most do-it-yourself car washes). The hot water kills organisms and the pressure removes mud and vegetation. No need to use chemicals or soap.
- Dispose of debris in trash or on dry land away from water or ramp.

DRAIN. Drain all water from watercraft and equipment.

- Drain or remove water from boat, bilge, live well, engine, internal compartments, and bait buckets by removing drain plugs before leaving the access area.

DRY. Aquatic invaders can survive only in water and wet areas.

- Dry your watercraft and fishing equipment thoroughly; this will kill most invasive species. The longer you keep your watercraft, trailer, waders, and other equipment outside in the hot sun between fishing trips, the better.

If you have any comments or concerns about maps or notice incorrect information, please contact your local Fish, Wildlife and Parks office so the problem can be corrected.

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
1	Anderson Reservoir	T29N,R21E,S24	48.25557	108.94729	Private	Dodson	Rainbow Trout	12 surface acres. **No landowner permission is required.** Annual plants of 2,000 fingerling Rainbow Trout.
Directions: South of Chinook on Hwy 240 to Cleveland, east on Peoples Crk Rd 5 mi, right on Barney Olson Rd for 7mi, left on Left Fork Snake Butte Rd. 1.5 mi								
2	Anita Reservior	37N,19E,S30	48.92960	109.28140	Federal (BLM)	Havre	Yellow Perch, Black Crappie, Rainbow Trout, Walleye	45 surface acres. Stocked alternate years with 5000 Walleye and annually with 5,000 Rainbow Trout.
Directions: East of Chinook take Elloam Rd north 14 miles, keep right on Sage Rd 12 miles, left on Middle Rd 1mi, keep left on two track 1.5 mi.								
3	BR 028 (Billmayer Reservoir)	T34N,R25E,S22	48.69380	108.45110	Private	Harlem	Rainbow Trout, Bluegill	4.5 acre reservoir. Annual plants of Rainbow Trout. **No landowner permission is required. Don't travel when wet.**
Directions: South of Turner 6 miles, take Black Coulee Rd south for 2 miles, right on Maloney Trail/Duck Pond Rd. for 3.25 mi., left on 2 track heading east for 1 mile								
4	BR 047 Reservoir	34N,21E,S31	48.65700	109.03930	Federal (BLM)	Havre	Largemouth Bass and Bluegill	8 surface acres. Stocked in 2015 and 2019 with 2,000 and 1,000 Largemouth bass, respectively.
Directions: West of Zurich 0.5 mile take Cherry Ridge Rd. north 5 miles. Pond is on the right.								
5	Brookie Pond	T37N,R21E,S28	48.93130	108.97907	Private	Havre	Rainbow Trout	4 surface acres. **No landowner permission is required.** Alternate year plants of 1,000 fingerling Rainbow Trout.
Directions: 19 miles north on Cherry Ridge Rd, keep right for 3 miles, then turn north for 4.5 miles.								

Blaine County (continued)

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
6	Chouteau Reservoir	T36N,R20E,S36	48.83367	109.04694	Federal (State)	Havre	Black Crappie and Rainbow Trout	10 surface acres. Annually stocked with 2,000 fingerling Rainbow Trout.
Directions: On Hwy 2 west of Zurich 0.5 mile, turn north on Cherry Ridge Rd for 17 miles. Reservoir is on the left.								
7	Cow Creek Reservoir	T27N,R19E,S21	48.08620	109.29370	Private	Rocky Boy	Walleye, Channel Catfish, Tiger Muskie, Yellow Perch, and Black Crappie	82 surface acres. **Landowner permission required for overnight camping.** Stocked alternate years with 3,000 Walleye and periodic plants of Channel Catfish and Tiger Muskie.
Directions: From Cleveland take Peoples Crk Rd west 10 miles, left on Lloyd Rd for 10 miles, reservoir is on the left.								
8	Don Reservoir	T36N,R20E,S15	48.87423	109.10929	Federal (BLM)	Havre	Largemouth Bass and Bluegill	2 surface acres.
Directions: 3 miles east of Chinook, take Bagan Rd north 19 miles, right onto G-W Rd 1 mile, then left on 2 track for 1 mile.								
9	Dry Fork Reservoir	T34N,R19E,S35	48.67620	109.21100	Private Federal	Havre	Northern Pike, Walleye, Largemouth Bass, Black Crappie, Yellow Perch, Rainbow Trout	350 surface acres. Annually stocked with 20,000 Rainbow Trout and alternate year plants of 10,000 Walleye. Dam is private, but majority of shoreline is public land. Subject to severe irrigation drawdown during prolonged drought periods.
Directions: 2 miles east of Chinook take Elloam Rd north 4.5 miles, turn right onto Middle Rd for 2 miles.								
10	Faber Reservoir	T29N,R20E,S21	48.26330	109.13557	State (FWP FAS)	Rocky Boy	Rainbow Trout	38 surface acres. 10,000 fingerling Rainbow Trout stocked annually.
Directions: 20 miles south of Chinook on Hwy 240 and then 0.75 mile southeast of Cleveland on gravel road.								

Blaine County (continued)

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
11	Gazob Reservoir	T26N,R22E,S18	48.01270	108.95250	Federal (BLM)	Dodson	Largemouth Bass, Bluegill	7.5 acres.
Directions: From Cleveland go west on Peoples Creek Rd 6.5 mi., left onto Birdtail Rd approx. 19 miles, left on Timber Ridge Rd 6.5 miles, turn left 1.3 mi.								
12	Grasshopper Reservoir	T31N,R19E,S29	48.41542	109.28261	Private	Rocky Boy	Rainbow Trout, Tiger Muskie	24 surface acres. **No landowner permission required.** Annual plants of 2,500 Rainbow in the spring and alternate year plants of 3,000 in the fall. Stocked with 150 fingerling Tiger Muskie in 2013.
Directions: Take Hwy 240 south out of Chinook 4.5 miles,turn right onto Lloyd Rd. approx. 7 miles.								
13	H.C. Kuhr Reservoir	T29N,R21E,S03	48.33664	109.23133	Private	Rocky Boy	Rainbow Trout	27 surface acres. Annual plants of 3,000 Rainbow Trout. **No landowner permission required. Special regulation, closed Oct 1-Nov 30.**
Directions: 17 miles south of Chinook on Hwy 240, turn right and follow signs for 1 mi (across bridge) to reservoir.								
14	North Faber Reservoir	T33N,R21E,S21	48.60649	108.99012	Federal (BLM)	Harlem	Rainbow Trout, Bluegill and Largemouth Bass	7 surface acres. Annual plants of 1,500 fingerling Rainbow Trout.
Directions: 1.5 miles east of Zurich take Oberg Rd north for approx. 2 miles.								
15	North Polly Reservoir	34N,22E,S19	48.69603	108.90552	Private	Harlem	Rainbow Trout and Black Crappie	7 surface acres. Alternate year plants of 2,000 rainbow trout. **No Landowner permission required.**
Directions: 1.5 miles east of Zurich take Oberg Rd north 9 miles, turn right onto two track and continue east 4 miles.								

Blaine County (continued)

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
16	Petrie Pond	T37N,R26E,S36	48.91710	108.25425	State (DNRC)	Harlem	Brook Trout	2 surface acres. **Landowner permission is required to access the state land.** Alternate year plants of 1,000 Brook Trout.
Directions: Take Hwy 241 north of Turner 5 miles, right onto Sids Rd for approx. 3 miles, right onto Pig Spring Rd approx. 3 miles.								
17	Reser Reservoir	T34N,R18E,S08	48.71706	109.39727	Federal (BLM)	Havre	Rainbow Trout, Bluegill, Largemouth Bass, Yellow Perch and Black Crappie	24 surface acres. Drained to repair dam in 2018. Will be restocked when work is complete and reservoir fills.
Directions: 7.5 miles west of Chinook on Hwy 2, north onto Highland Rd 8.5 miles, right onto Westfork Rd 2miles, left onto Reser Rd 1 mile.								
18	Ross Reservoir	T29N,R18E,S07	48.29080	109.43260	Private	Rocky Boy	Yellowstone Cutthroat Trout	6 surface acres. No landowner permission required for fishing. Annually stocked with 2,000 Yellowstone Cutthroat Trout **Special regulation: Open 3rd Saturday in May through November 30.**
Directions: Take Clear Creek Rd out of Chinook approx. 20 miles, left at ranch house. Reservoir 2 miles up the road.								
19	Salmo Reservoir	T33N,R20E,S18	48.61920	109.16630	Federal (BLM)	Harve	Rainbow Trout, Largemouth Bass, Bluegill, Yellow Perch, Channel Catfish	5 surface acres. Annual plants of 1,000 fingerling Rainbow Trout.
Directions: 3 miles east of Chinook, take Bagan Rd. north 2 miles, turn left onto two track, pond 1/2 mile.								
20	South Casady - BR 019 Reservoir	T34N,R17E,S22	48.68650	109.49950	Federal (BLM)	Havre	Black Bullhead	10 surface acres.
Directions: 7.5 miles west of Chinook on Hwy 2, north on Highland Rd 8.5 miles, left onto Casady Rd 2.5 miles, turn left for 1mi.								

Blaine County (continued)

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
21	South Polly Reservoir	34N,22E,S19	48.68874	108.90273	Private	Harlem	Rainbow Trout	3.5 surface acres. Alternate year plants of 500 fingerling rainbow trout. **No Landowner permission required.**

Directions: Same directions as North Polly, but cross North Polly dam and continue south for 0.5 mile.

Phillips County

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
1	Bar Island Reservoir	T23N,R24E,S24	47.74559	108.57841	Federal (BLM)	Zortman	Yellow Perch and Largemouth Bass	12 surface acres. Stocked in 2019 with 500 Largemouth Bass.
Directions: Approx. 2 mi east of DY junction on Hwy 191 turn south on Robinson Rd for 2.5 mi, keep right and go south 2.5 mi, then right 0.25 mi.								
2	Batosh Reservoir	T23N,R25E,S28	47.73248	108.50975	Federal (BLM)	Zortman	Rainbow Trout	2 surface acres. Alternate year plants of 1,000 fingerling Rainbow Trout.
Directions: South of Hwy 191 and Dry Fork Rd, take Manning Coral Rd south 6 mi, turn right, go 0.5 mi then left 0.75 mi.								
3	Bison Bone Reservoir	T24N,R27E,S32	47.79901	108.28461	Federal (BLM)	Zortman	Yellow Perch	26 surface acres.
Directions: From Hwy 191, 10.5 miles east on Dry Fork Rd. turn left, reservoir is another 1/2 mile on unmarked road.								
4	Bresaylor Reservoir	T23N,R25E,S20	47.73611	108.53531	Federal (BLM)	Zortman	Largemouth Bass	4 surface acres.
Directions: South of Hwy 191 and Dry Fork Rd, take Manning Coral Rd south 6 mi, turn right, go 1.75 mi, cross Lark dam, then left .5 mi.								
5	Cole Ponds	T32N,R33E,S08	48.54242	107.46568	State (FWP FAS)	Whitewater	Northern Pike, Largemouth Bass, Yellow Perch, Black Crappie, Rainbow Trout, Pumpkin Seed	Consists of three ponds covering about 9 surface acres. Each annually stocked with 2,000 catchable Rainbow Trout.
Directions: 10 miles northwest of Saco on Hwy 243								
6	Current Reservoir	T23N,R27E,S10	47.76777	108.24747	Federal (BLM)	Zortman	Rainbow Trout	11 surface acres. Annual plants of 3,000 fingerling Rainbow Trout.
Directions: 11.5 miles on Dry Fork Rd, turn right and follow for approx. 2 miles.								

Phillips County (continued)

Pond #	Pond Name	Pond Location	Lat.	Long.	Ownership	BLM Map	Species present	Comments
7	Douchette Lake	T31N,R28E,S26	48.41850	108.04809	Federal (BLM)	Dodson	Rainbow Trout, Largemouth Bass	6 surface acres. Alternate year plants of 1,000 Rainbow Trout. **Permission is required to access the BLM land the reservoir is located on.**
Directions: 9 mi west of Malta, north on N Wagner Rd. for 0.25 mile, keep right, go 3 miles, right on two track through private land 0.5 mi.								
8	Ester Lake	T27N,R27E,S16	48.09845	108.25817	State (DNRC)	Dodson	Walleye, Northern Pike, Yellow Perch, Crappie and Smallmouth Bass	144 surface acres. Annually stocked with 4,000 Walleye.
Directions: Approx. 24 miles south of Malta, take Hog Ranch Rd west off Hwy 191, approx. 3.5 miles.								
9	Flake Reservoir	T37N,R32E,S14	48.96510	107.47671	Federal (BLM)	Whitewater	Rainbow Trout	6 surface acres. Alternate year plants of 1,000 fingerling Rainbow Trout.
Directions: From Whitewater take E Whitewater Rd east 5.25 miles, turn left on N Forks Rd, north for 15 miles, turn right, 1.5 miles. Reservoir on right.

Directions: Approximately 4 miles northeast of Plentywood off Hwy 16.

FishMT

We have also made all our fisheries data available to you through "FishMT" online by clicking **http://fwp.mt.gov/fish/**. There you can find data, reports, fishing opportunities, fish distribution, Fishing Access Sites, fish stocking information, contact information, and much more. Most of the data are available through an easy to use interactive map (click the "Explore" tile), and the other tiles take you to even more resources. These data are available because they connect, in real time, to our internal database. So, as we conduct more surveys, and enter those data, they are available to you immediately. We now have tens of thousands of fisheries surveys, millions of fish records, information on thousands of waterbodies, and more, all available to you online. We are also working on other improvements like fish tag reporting and an interactive database for fishing regulations.

Another tool for anglers is our recently released app that is a field guide to the Fishes of Montana. This app is free to download and is available in all the app stores. Once you download it you don't need any internet connectivity to learn about all of Montana's interesting fish and identify your catch. This app is an update to FWP's Field Guide to Montana fFishes and the "Fishes of Montana" book. We developed this app in cooperation with Montana State University and High Country Apps and it is really easy to use and informative. It is the most up to date source for fish information in Montana.

500 copies of this public document were published at an estimated cost of $6.90 per copy, for a total cost of $3,450.00 which includes $3,450.00 for printing and $0.00 for distribution.

THE **OUTSIDE** IS IN US ALL.
