*The 2011 Block Management Report contains errors in the acreage reported for the years 2009 and 2010. These errors occurred due to confusion associated with a major transfer of landownership in Region 2, called the Montana Legacy Project, that involved Plum Creek Timber and Land Company transferring ownership of 310,000 acres to The Nature Conservancy Since 1996, 358,836 private land acres formerly enrolled in Block Management in Region 2 have been converted to state or federal ownership.

Additional Context:

-From past Block Management Cooperator surveys, the number 1 reason for leaving Block Management overtime is land sale. Trends from the late 2000s are true today- some larger acreages (particularly R7) being replaced by smaller acreages; large ranches enrolling smaller portions; long time cooperators drop out primarily due to land sales or generational changes; program averages 3-5% attrition of cooperators since 1996.

-From a program standpoint, we've been trying to cut out public acres enrolled on BMA contracts- or counted within the boundary of the BMA. To some extent this contributes to a decline in overall (total) acres. Additionally some database clean-up/pairing with MT Cadastral represents about 50,000 acre net decline in R6 in 2022.

¹ No data prior to 1999. Hunter days are an average that may or may not change based on program policy. Originally 20% change up or down resulted in recalculation. 4 year rolling average instituted in 2015

² Hunter days for large corporate timber in R1/R2 are estimated based on a hunter day/acre calculation instituted in 2020.
