Subject: [EXTERNAL] 2021 Wolf Season—Proposed Rules
Date: Monday, July 26, 2021 2:20:13 PM

Montana Fish & Wildlife Commission,

I am writing to comment on the proposed rules for managing wolves under recently-passed legislation.

The 2021 Legislature went too far, passing extreme anti-wolf measures that are out of step with what most Montanans want. Wolf mortality is already at an all-time high—400 wolves died in 2019 (300 by hunting & trapping). Expanding seasons and adding new wolf killing measures is unnecessary and unwise.

Please keep snares off of the public lands where many Montanans like to recreate. They create a hazard for people, pets and wildlife. And since snares are cheap, trappers may place thousands out on the landscape, neglecting to pick them up after the trapping season closes.

Please retain the limited quotas for wolves adjacent to our National Parks—millions of tourists spend money in Montana's gateway communities around the National Parks, hoping to catch a glimpse of a wolf, bear and other wildlife.

Please also continue to prohibit the use of bait and hunting at night.

The recovery of wolves in Montana is one of the great American wildlife conservation achievements, about which Montanans are proud to have played a key role. Let's keep it that way with a conservative and cautious approach to wolf management.

Thank you for the opportunity to provide comment.

Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting and Trapping Regulations
Date: Monday, July 26, 2021 4:18:24 PM

Dear Montana Fish and Wildlife Commission,

As a Montana resident, I request that the Commission adopt the Limited New Tools rules for each of the seven options. I advocate for wolf management to be based on the scientific evidence and that ethical measures of fair-chase principles be adopted for wolf hunting. Recovery of wolves in Yellowstone National Park is among the greatest American wildlife conservation achievements. Montanans are proud to have played a key role in the wolf recovery success up to the present.

Like thousands of others, I have contributed to the economy of Yellowstone National Park, West Yellowstone, and Gardiner by purchasing and participating in wolf watching tours. Wolf watching, scientific studies, and all associated activities are strong year-round economic drivers in gateway communities of Montana. Thus, careful consideration is needed regarding making decisions in buffer zones that may jeopardize the integrity of wolf packs in Yellowstone National Park, destroy public trust, and negatively impact tou

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Additionally wolves in the Northern Rockies are key to re-establishing wolf populations in the Pacific Northwest. Millions of people come every year to the Rockies for the chance to see a wolf in the wild.

We urge you to preserve Montana's historically reasoned and science-based approach to wildlife management, which unfortunately regressed back to the 1800s with a host of extreme bills targeted at wolves and other species in the recent legislative session. As members of the Fish, Wildlife and Parks Commission, you have the opportunity and responsibility to restore public trust and to continue a rational, science-based approach to wolf management.

Specifically, we urge you to severely limit snaring, which threatens not only wolves but also threatened grizzly bears and Canada lynx and other wildlife on both public and private lands, as well as pets. We urge you to heed the cautions expressed by Montana Fish, Wildlife and Parks (FWP) wildlife professionals in regard to incidental capture of grizzly bears in snares and human safety threats, and urge you not to extend the hunting and trapping season in either the fall or spring. Please do not allow unethical measures including baiting and spotlighting of wolves, or the killing of an unlimited number of wolves by a single license holder. All of these measures destroy the public's trust in Montana's management of wolves and other wildlife and are antithetical to fair-chase hunting principles. We urge you not to eliminate the wolf quotas in hunting districts adjacent to Montana's National Parks. Lastly, as FWP has reported, there has already been a 15-20% decline in the wolf population as a result of increased wolf mortality in last year's hunting and trapping season. We urge you not to enact measures to further reduce the wolf population. To help restore public trust, all incidental capture of wildlife must be reported immediately and that information made available to the public on an annual basis, and the trigger for rapid consideration of in-season adjustments of the wolf hunting regulations should be based on a much more cautious approach to wolf mortality than what FWP has recommended.

Sincerely,

Patricia Steinmuller

Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting and Trapping Regulations
Date: Monday, July 26, 2021 3:46:10 PM

Dear Montana Fish and Wildlife Commission,

I am a hunter in Montana and believe wolves need to be protected for the better of wildlife populations. They take out the sick and weak animals while we as hunters do the opposite. I've never seen a wolf in the wild and am hoping I will one day. I believe in fair and not cruel practices in all aspects of hunting. I want wolves to be protected.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Caroline Kirsch

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

I'm also writing for my husband, Jerry Sellers, whose bucket list carried a top notation to save the wolves. Jerry has been gone for eleven years, however I still advocate for wolves in his memory. Wolves play a special role in or ecosystem. They can be managed to protect the ranchers and farmers needs without killing them outright. Do some serious research and planning in order to make some changes before killing them all.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Brian Robinson

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect all wolves:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state. Wild animals have as much right to live on this planet as we do and we have no right to make laws

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Subject: [EXTERNAL] Montana 2021 Wolf Season Proposal
Date: Monday, July 26, 2021 3:52:13 PM

To The Montana Authorities:

I urge the Commission and to make revisions to the 2021 Montana Wolf Season as soon as possible. These revisions will prevent animal needless and additional pain, suffering and cruelty.

Please revise:

- **Require 24-hour trap checks.**
- **Prohibit the use of snares on public lands.**
- **Obtain written permission from landowner for the use of snares.**
- **Require wolf trapping certification inclusive of snaring for anyone trapping for wolves.**
- **Require snares have diverters, relaxing lock, 275 lb. rated breakaway, a stop for a minimum loop size of 10", and the bottom of the loop a minimum of 18" above the surface.**
- **Limit the number of wolves who can be snared to one per certified trapper.**
- **Limit the number of snares and leghold traps a trapper can set.**
- **Require trappers keep maps of their snare locations.**
- **Prohibit power snares and the use of drags on traps and snares.**
- **Require disclosures and warning signs for traps and snares on block management areas.**
- **Revise wolf trapping season dates to January 2 - Feb 28 to try to avoid incidental trapping of grizzlies and upland game bird dogs.**
- **Prohibit the use of snares on high use areas of wintering elk and deer.**
- **Apply setback of minimum 150' to all public roads for traps and snares.**
- **Require trapping warning signage at trail heads and high use recreational areas.**
- **Establish 1 wolf quota or closure of the wolf season in units over elk management objectives, where elk shoulder seasons occur, where chronic wasting disease has been detected.**
- **Maintain a maximum quota of 1 wolf in units adjacent to national parks. Overage comes off the following year/s or adjacent applicable wolf management units.**
- **Allow 1 wolf per license.**
- **Present the hide and skull of all trapped or shot wolves in an unfrozen condition to designated FWP.**
- **Prohibit the use of bait and night hunting of wolves.**
- **Require the reporting of all non-target catches.**

Thank you,
Troy Regan

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

Please Montana, don't be as barbaric as Idaho in regard to wolf populations. Cows and sheep are replaceable, wild animals are not. I have vowed to not spend any money whatsoever in Idaho. I like Montana a lot, as long as it stays friendly to wild creatures.

Specifically:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Date: Monday, July 26, 2021 9:20:50 AM

Friends in Helena,

A rancher here in Southwestern MT, ranching and living next to Yellowstone Park. Let's be careful on the bigger picture here. Let's honor all of our struggles while we try to maintain agriculture and wide open spaces in places like the GYE. Let's remember we're all just trying to remain- both the HUMAN and the NON-HUMAN.

We have a variety of preventative measures in terms of livestock loss for ranchers who live and work in wild places. And we're always happen to share and gather information around this. Why not, right?

Please reach out if you have any questions. Montana can do better than these proposals. Montana IS better than these proposals.

Thank you!

Subject: [EXTERNAL] 2021 Wolf Season—Proposed Rules
Date: Sunday, July 25, 2021 9:07:46 PM

Montana Fish & Wildlife Commission,

I am writing to comment on the proposed rules for managing wolves under recently-passed legislation.

The 2021 Legislature went too far, passing extreme anti-wolf measures that are out of step with what most Montanans want. Wolf mortality is already at an all-time high—400 wolves died in 2019 (300 by hunting & trapping). Expanding seasons and adding new wolf killing measures is unnecessary and unwise.

Please keep snares off of the public lands where many Montanans like to recreate. They create a hazard for people, pets and wildlife. And since snares are cheap, trappers may place thousands out on the landscape, neglecting to pick them up after the trapping season closes.

Please retain the limited quotas for wolves adjacent to our National Parks—millions of tourists spend money in Montana's gateway communities around the National Parks, hoping to catch a glimpse of a wolf, bear and other wildlife.

Please also continue to prohibit the use of bait and hunting at night.

The recovery of wolves in Montana is one of the great American wildlife conservation achievements, about which Montanans are proud to have played a key role. Let's keep it that way with a conservative and cautious approach to wolf management.

Thank you for the opportunity to provide comment.

Please protect the wolves. They are essential to our ecosystem.

Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting and Trapping Regulations
Date: Sunday, July 25, 2021 4:55:39 PM

Dear Montana Fish and Wildlife Commission,

I oppose the proposals designed to slaughter wolves to drastically reduce their numbers. Allowing motorized roundup, night lights, baiting, hounds, and snares/traps all violate MT's fair-chase hunting tradition. Trapping is a barbaric and unnecessarily cruel 'sport' with a terrible record of collateral damage to endangered species such as lynx. Moreover, several friends have had the traumatic experience of having their dogs killed or maimed by a trap set near recreational trails.

Wolves are an apex predator serving an important ecological function by removing weakened and CWD-diseased prey, thereby maintaining a natural balance. I host many out-of-state family and visitors who appreciate the presence of wolves and understand their important role in protecting biodiversity in Yellowstone NP.

MT's tourist economy and reputation would suffer if a wolf slaughter on the scale of Wisconsin's were allowed to occur. Stewardship values and science should guide wolf management decisions.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Additionally wolves in the Northern Rockies are key to re-establishing wolf populations in the Pacific Northwest. Millions of people come every year to the Rockies for the chance to see a wolf in the wild.

We urge you to preserve Montana's historically reasoned and science-based approach to wildlife management, which unfortunately regressed back to the 1800s with a host of extreme bills targeted at wolves and other species in the recent legislative session. As members of the Fish, Wildlife and Parks Commission, you have the opportunity and responsibility to restore public trust and to continue a rational, science-based approach to wolf management.

Specifically, we urge you to severely limit snaring, which threatens not only wolves but also threatened grizzly bears and Canada lynx and other wildlife on both public and private lands, as well as pets. We urge you to heed the cautions expressed by Montana Fish, Wildlife and Parks (FWP) wildlife professionals in regard to incidental capture of grizzly bears in snares and human safety threats, and urge you not to extend the hunting and trapping season in either the fall or spring. Please do not allow unethical measures including baiting and spotlighting of wolves, or the killing of an unlimited number of wolves by a single license holder. All of these measures destroy the public's trust in Montana's management of wolves and other wildlife and are antithetical to fair-chase hunting principles. We urge you not to eliminate the wolf quotas in hunting districts adjacent to Montana's National Parks. Lastly, as FWP has reported, there has already been a 15-20% decline in the wolf population as a result of increased wolf mortality in last year's hunting and trapping season. We urge you not to enact measures to further reduce the wolf population. To help restore public trust, all incidental capture of wildlife must be reported immediately and that information made available to the public on an annual basis, and the trigger for rapid consideration of in-season adjustments of the wolf hunting regulations should be based on a much more cautious approach to wolf mortality than what FWP has recommended.

Sincerely,

Dear Montana Fish and Wildlife Commission,

I lived in Jackson Hole, Wyoming when wolves were re-introduced. I know how much reintroduction helped tourism and improved the health of the Yellowstone Ecosystem. Please let's not go backward.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Additionally wolves in the Northern Rockies are key to re-establishing wolf populations in the Pacific Northwest. Millions of people come every year to the Rockies for the chance to see a wolf in the wild.

We urge you to preserve Montana's historically reasoned and science-based approach to wildlife management, which unfortunately regressed back to the 1800s with a host of extreme bills targeted at wolves and other species in the recent legislative session. As members of the Fish, Wildlife and Parks Commission, you have the opportunity and responsibility to restore public trust and to continue a rational, science-based approach to wolf management.

Specifically, we urge you to severely limit snaring, which threatens not only wolves but also threatened grizzly bears and Canada lynx and other wildlife on both public and private lands, as well as pets. We urge you to heed the cautions expressed by Montana Fish, Wildlife and Parks (FWP) wildlife professionals in regard to incidental capture of grizzly bears in snares and human safety threats, and urge you not to extend the hunting and trapping season in either the fall or spring. Please do not allow unethical measures including baiting and spotlighting of wolves, or the killing of an unlimited number of wolves by a single license holder. All of these measures destroy the public's trust in Montana's management of wolves and other wildlife and are antithetical to fair-chase hunting principles. We urge you not to eliminate the wolf quotas in hunting districts adjacent to Montana's National Parks. Lastly, as FWP has reported, there has already been a 15-20% decline in the wolf population as a result of increased wolf mortality in last year's hunting and trapping season. We urge you not to enact measures to further reduce the wolf population. To help restore public trust, all incidental capture of wildlife must be reported immediately and that information made available to the public on an annual basis, and the trigger for rapid consideration of in-season adjustments of the wolf hunting regulations should be based on a much more cautious approach to wolf mortality than what FWP has recommended.

Sincerely,

Beth J Taylor Wilson

Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting and Trapping Regulations
Date: Friday, July 23, 2021 8:53:10 PM

Dear Montana Fish and Wildlife Commission,

Wolves are an important part of the native wildlife community, that makes Montana a beautiful place to live. As we have seen in Yellowstone, their return has restored a more natural balance of prey and predators, resulting in healthier riparian habitats and the subsequent return of many other species. Wolves are a part of Montana and they belong.

We already have plenty of cattle, doing plenty of damage all over the landscape, especially to small waterways. I am tired of hearing cattle owning neighbors go on and on about how bad wolves are, while their neglected cows wander in the road at all hours, trample the creek into a stinking mud wallow, and eat up all the native vegetation. Cattle ranchers should learn to live with wolves, look after their herds better, and accept losing a few cows to predators, instead of constantly demanding that our wolves and other native wildlife be removed from our public land to protect their private businesses.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Date: Friday, July 23, 2021 8:46:55 PM

Dear Montana Fish and Wildlife Commission,

I am totally opposed to cruel and painful treatment of animals which would include snares and traps. There is no reason to kill a wolf at all unless he/she is known to have eaten one's livestock. In my opinion wolves have as much right to live as humans.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Dear Montana Fish and Wildlife Commission,

Please do all you can to restrict the impact of Montana's hunting regulations. Wolves keep down disease in sick elk, they stop overgrazing by wildlife, which leads to less erosion near rivers, improving fishing. Baiting and snaring kills pets, grizzlies, and lynx. We need to address the need to safeguard all life in the face of mass extinction and climate crisis. Please consider what i have said. Thank You.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting and Trapping Regulations
Date: Friday, July 23, 2021 5:03:16 PM

Dear Montana Fish and Wildlife Commission,

Management of a species, especially an apex species that greatly impacts an entire eco- system should be made based on data, science, and ethics. I am very disappointed with the Governor's push for unethical hunting and trapping practices to greatly reduce this species. I am fully aware of the financial aspects of this proposal. If this proposal is approved what type of wilderness/habitat has been left for future generations and how can we accept such unethical treatment of animals? Please do what is right not what makes wealthy individual's wealthier.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Subject: [EXTERNAL] Comment on 2021/2022 Wolf Hunting Regulations
Date: Monday, July 26, 2021 6:21:22 AM

Dear Montana Fish and Wildlife Commission,

You stupid Republicans keep screwing up the world with your backward ideas. You are antithetical to life, and then you lie and call yourselves Christians. What a joke that is!! You have done a great job of screwing things up, and yet like alcoholics who can't face the actualities of life, you refuse to notice. I'm beginning to believe that being a Republican is as much of a sickness as alcoholism or drug addiction. It involves that same divorce from reality. It's no wonder that we have an epidemic of opioid addiction in the United States. Do you really need to take everybody else down with you? Can't you just be satisfied with harming yourselves? It's the same with COVID, with climate change, and even with the insurrection at the Capitol in Washington, DC. You're a bunch of idiots!! And, I do believe you have become evil people, sadly.

I am commenting today to urge the Commission to use your discretion and authority to restore the public's trust in Montana's wildlife management, and to take a measured and prudent approach with the state's 2021/2022 wolf hunting and trapping regulations proposal. Grey Wolves are a native keystone species; they play an important ecological role in balancing natural systems and reducing the spread of fatal wildlife diseases such as Chronic Wasting Disease by culling sick animals from herds. Additionally wolves in the Northern Rockies are key to re-establishing wolf populations in the Pacific Northwest. Millions of people come every year to the Rockies for the chance to see a wolf in the wild.

We urge you to preserve Montana's historically reasoned and science-based approach to wildlife management, which unfortunately regressed back to the 1800s with a host of extreme bills targeted at wolves and other species in the recent legislative session. As members of the Fish, Wildlife and Parks Commission, you have the opportunity and responsibility to restore public trust and to continue a rational, science-based approach to wolf management.

Specifically, we urge you to severely limit snaring, which threatens not only wolves but also threatened grizzly bears and Canada lynx and other wildlife on both public and private lands, as well as pets. We urge you to heed the cautions expressed by Montana Fish, Wildlife and Parks (FWP) wildlife professionals in regard to incidental capture of grizzly bears in snares and human safety threats, and urge you not to extend the hunting and trapping season in either the fall or spring. Please do not allow unethical measures including baiting and spotlighting of wolves, or the killing of an unlimited number of wolves by a single license holder. All of these measures destroy the public's trust in Montana's management of wolves and other wildlife and are antithetical to fair-chase hunting principles. We urge you not to eliminate the wolf quotas in hunting districts adjacent to Montana's National Parks. Lastly, as FWP has reported, there has already been a 15-20% decline in the wolf population as a result of increased wolf mortality in last year's hunting and trapping season. We urge you not to enact measures to further reduce the wolf population. To help restore public trust, all incidental capture of wildlife must be reported immediately and that information made available to the public on an annual basis, and the trigger for rapid consideration of in-season adjustments of the wolf hunting regulations should be based on a much more cautious approach to wolf mortality than what FWP has recommended.

Sincerely,

Patricia Koleini

Subject: [EXTERNAL] Disgusting, thats what the Wolf Hunting and Trapping Proposals are
Date: Monday, July 26, 2021 9:11:51 AM

Dear Montana Fish & Wildlife Commission,

I object that tax dollars are being used to kill, kill and kill a little more. Not only is it unnecessary, but it is also disgustingly inhuman, shows no respect for life and nature.

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Sincerely,
Heide Hennen

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Christian Johnson

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

Your " laws are for ordinary folks, not me " Montana governor got a " almost slap on the wrist " from wildlife officials over killing of a radio-collared wolf near Yellowstone in February just weeks after taking office. Gianforte trapped and then shot the male wolf on Feb. 15 about 16 kilometers north of the park. I can't imagine any " sportsman " or real " hunter " I know, resorting to such pitiful, despicable, behavior. First setting a trap, then shooting a helpless animal. What kind of sorry excuse for a human being engages in that kind of " manly " action? Oh, yeah, a gutless coward!

The male wolf was 6 to 7 years old and had been born in Yellowstone National Park. It was fitted with a radio collar to track its movements in 2018, park spokesperson Morgan Warthin said. The animal was a member of the park's Wapiti Lake and 8 Mile packs, then went off on its own to find a mate.

Trappers have the option to release radio collared animals so they can continue to be used for research. The certification course the newly elected Governor failed to take includes instruction on the importance of radio collared wolves to monitor the population and manage wolf pack attacks on livestock.

"A wolf that's been wearing a radio collar is going to be a terrible trophy, because those collars mess up the fur around their neck," said Carter Niemeyer, a former wolf recovery coordinator for the U.S. Fish and Wildlife Service. "And then symbolically, you've got a wolf that researchers spent thousands of dollars on, and then to have somebody thoughtlessly kill that animal when they could have released it back to research -- that's a lot of poor judgement."

Wolves are critical Apex predators essential to maintaining healthy ecosystems. You really want to help this imbecile slaughter 90% of Montana's wolves. If so, you are no better and no smarter than this dufus governor is.

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible (that is to say most of them) in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands; unfortunately, most other animals didn't learn to read and write while attending elementary school so will end up in snares intended for wolves. Duh!
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible (again, that is to say, most of them) in implementing these mindless, cruel, and barbaric new laws.

Sincerely,

james field

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing in opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices, and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Lynne Glaeske

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Jan Hammond

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Midori Nakayama

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Dear Montana Fish & Wildlife Commission,

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Dear Montana Fish & Wildlife Commission,

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Dear Montana Fish & Wildlife Commission,

This is unconscionable. Do you have any respect for life? Farmers are not able to work with nature? Too bad because there are much better alternatives. How would you like this garbage happening to your family? Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Sincerely,
Becky Muradian

Dear Montana Fish & Wildlife Commission,

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Sincerely,
John Williams

Dear Montana Fish & Wildlife Commission,

Why must you continue your corruption and cater to bloodthirsty murderers? Are the payoffs you receive in return for allowing rampant murder of wolves, really worth it? Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

Dear Montana Fish & Wildlife Commission,

I am very disappointed in the leadership of Montana and saddened by the treatment of wolves and other predators in the state. I will no longer spend any tourist dollars in the state and cancelled our trip to Glacier Park this year. Nature belongs to nature and everyone, not just the few “hunters” and ranchers in your state who are cruel and kill for the joy of killing. Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Subject: [EXTERNAL] I Oppose the Wolf Hunting and Trapping Proposals
Date: Saturday, July 24, 2021 2:24:37 PM

Dear Montana Fish & Wildlife Commission,

I recently watched a live stream of the anti-wolf bills that passed through the Montana legislature. The scene was of a chairman or moderator calling on individuals to speak. These individuals were divided into pro-wolf and anti-wolf camps. It is predictable what each said.

In attendance was a state wildlife biologist. But in this hearing chamber - where the lives of these animals, who at this moment were living their lives completely unaware that their fates were being decided on thin sheets of paper by old men in suits - the biologist did not speak. He did not provide numbers and charts and the years upon years of data his state has compiled on these animals.

Instead, he was allotted a time to answer questions by the members of the Montana legislature in the room. And the single question he was asked, by some politician seated in a cushy chair behind a formica table, was this: in regards to the actual price of wolf pelts. Didn't they fetch a bit more than the earlier speaker had suggested? This was the question. Not questions on elk herd numbers, or livestock predation. Not of pack movement and prey dispersion, and the health of herds. Of how wolves target the weak, sick, and injured of a herd, therefore strengthening it over time. Not of numbers on livestock predation, or on the effectiveness of non-lethal measures. Of all the obvious damn things science has already plainly shown. In this hearing the biologist did not speak. Instead we heard anecdotes from anti-wolf people and then we heard the sentiments of those who wish to save them. Like the back and forth political comments on Facebook. The fates of these animals in balance. And the biologist did not speak.

That's the thing though, the numbers tell a wildly different story than the narrative put forward by those who wish to see these animals killed. Their narrative is one of voracious out-of-control unnatural killers who are decimating elk herds and livestock, without any natural checks, who kill for fun, and who through their monstrous behavior are savagely destroying the western way of life. There are too many of them! We are being overrun ! This is the narrative they sell, peppered with anecdotes of helpless hunters being surrounded by voracious wolf packs and empty forests that used to be brimming with elk and other animals but now are silent. And oh! How that story of unnatural, insatiable killers imposed on a region by a tyrannical federal government sells. And like all good lies, it holds the smallest grains of truth.

But fear sells. You know that don't you?

Idaho's SB1211, which has been signed into law and Montana's SB314, which has been signed but awaits final approval, bypass state Fish and Wildlife biologists to follow language written by ranching lobbyists, hunting organizations, and politicians in order to kill more wolves. These laws are motivated by false narratives that directly contradict data and decades of study by wildlife biologists.

They seek to kill all the wolves in their states, down to the number of 150, which is a number below which Federal Endangered Species act protections will kick back in, thus removing their ability to kill. This will be a slaughter of thousands of animals by any means necessary. Killing by airplane, snowmobile, snare - they seek to kill pups in their den. Many wolves will die and many will suffer. The proponents of these bills use the word sustainable, which is a word that has origins in conservation, but these days is a mockery of itself and often used as a way to perpetuate wildlife and habitat exploitation. To ignore for a moment the moral question of massacring one of the most

intelligent and social animals on this planet to satisfy our own greed, killing a keystone species like the wolf does not in fact improve an ecosystem.

Please reconsider your actions to reduce your states grey wolf populations , the science tells a different story from the fanatics.

Sincerely,
Jonathan Wall

Dear Montana Fish & Wildlife Commission,

Does montana want to be known as one of the most ruthless states in the merciless killing of wolves? What a terrible reputation to attain and horrendous public relations to deal with.

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Sincerely,
Garth Orkney

Dear Montana Fish & Wildlife Commission,

Montana already has aggressive hunting and trapping seasons for wolves — and its wolf population is already decreasing. The state doesn't need to expand the seasons or approve new tools for killing wolves.

For example, I oppose rules allowing baiting wolves and killing wolves at night because they violate fair-chase ethics and increase the risk of killing other wildlife and even family dogs.

I also oppose increasing the bag limit for wolves — a single hunter shouldn't be able to wipe out an entire pack of wolves. And hunters should be required to obtain one license for each wolf killed.

I don't support any form of snaring, and I ask you to ban snaring on public lands and limit snaring elsewhere as much as possible.

These common-sense measures will help save the lives of grizzly bears, Canada lynx and other wildlife, as well as companion animals.

Thank you for considering my comment.

Dear Montana Fish & Wildlife Commission,

Dear Commissioners,

We find ourselves at a point in time in which we as humans are out of balance with nature.

In Montana, you are fortunate stewards of a grand landscape used for many purposes by many living creatures. With the forces upon us as humans to succeed, it is very difficult to establish a balance with nature - let alone envision what that might look like.

In my own landscape, a wooded hilly area just north of the Golden Gate Bridge, we too struggle as a community with the balance of nature. My very suburban unfenced yard abuts others that form a wildlife corridor, through which pass deer, coyotes, turkeys, bobcats, quail, squirrels, snakes, skunks, raccoons, and apparently mountain lions. Predatory and migratory birds nest in our trees.

Plenty of neighbors fence their property to prevent these animals from “eating their plants” or “killing their pets.” I would love to have beautifully landscaped yards like theirs. I would definitely get a lot more money when I sell — like a six-figure premium. I also wouldn’t have to worry about my Siberian Husky escaping as much.

In my own journey to seeking a balance with nature, I have made choices that frankly do not benefit me personally at all. In fact, there is an opportunity cost to my own balance sheet to allowing nature an easement on “my” property.

We don’t all agree on what is right and what is wrong. I am not here to tell you from my dining room table in California what to do in Montana.

But, as one animal lover to another, I’m asking you to reconsider your stance on wolf hunting and trapping - or any kind of culling. You know as well as I do that these are extremely beautiful, intelligent, social creatures that deserve respect. Cruelty is unforgivable

I urge you to push your creativity to consider how we can use this time to redefine the balance of wolves in your landscape. How can you cohabitate with wolves in a new and mutually beneficial way?

Thank you for considering my comment.

Sincerely,
Julie Busch

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that expand the slaughter of wolves in Montana. Your agency knows that the science does not support these laws. The Commission can mitigate the effects of these laws by:

- 1) Not expanding the wolf hunting and trapping season
- 2) Banning the use of snares on public lands
- 3) Prohibiting the use of bait for hunting and trapping
- 4.) Prohibiting night hunting across the state

Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state. Why would the Commission interfere with the economic gains that wolves provide.

Additionally, if the Commission doesn't bring sensible tactics to wolf management, the federal government will. Is that what MT wants?

Sincerely,

Peg Rooney

Montana Fish and Wildlife Commission

Dear Wildlife Commission,

I'm writing to express my opposition to sweeping new laws that create the potential to expand the slaughter of wolves in Montana through cruel and barbaric hunting practices and to urge the Commission to exercise its authority to protect wolves.

While some may call these new laws wolf "management," the intent is obvious: the decimation of wolf populations across Montana.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing new laws. This includes:

- 1) Forgoing the expansion of the wolf hunting and trapping season;
- 2) Banning the use of snares on public lands;
- 3) Prohibiting the use of baits for hunting and trapping and prohibiting night hunting across the state; and
- 4) Limiting the hunting of wolves to one wolf per license, with the lowest bag limit allowed per law applied across the state.

Wolves are an important native wildlife species in Montana and wolves are an important part of healthy ecosystems. Wildlife lovers from around the world come to Montana for the chance to see wolves, providing an important economic benefit to the state.

I urge the Commission to use its discretion to protect as many wolves as possible in implementing these cruel and barbaric new laws.

Sincerely,

Mike Stoakes
