Q2

Please comment on FWP's proposal to release about five trumpeter swans yearly from 2022-2026.

I am for releasing 5 trumpeter swans- however, I do question why we allow them to be harvested? Because there is no language discouraging harvesting Trumpeters on the swan permits... I watched many people actually target them- instead of tundras - they are pretty easy to tell apart. Other states close the season early after so many trumpeters are harvested and/or include language discouraging harvesting trumpeters. Thank you!

ONLY if there's suitable habitat AND the Commission BANS all Tundra Swan hunting. How ridiculous! I defy any member of the Commission to correctly identify a Trumpeter Swan from a Tundra Swan in the field....BEFORE it is shot dead.

Please comment on FWP's proposal to release about five trumpeter swans yearly from 2022-2026.

Ducks Unlimited applauds the long-time efforts of MT Fish, Wildlife and Parks and its partners conserving wetland habitat in the middle Madison Valley for trumpeter swans, other waterfowl, and wildlife species dependent on that landscape for some portion of their annual lifecycle. The restoration and reintroduction accomplishments in the valley have improved pair bonding, successful nesting, community involvement and support, and collaborative partnerships with private landowners and private industry.

To augment the continued habitat conservation efforts in the valley, Ducks Unlimited is in full support of the reintroduction of captive raised trumpeter swans to help address slow growth and flock isolation challenges of the Rocky Mountain population.

Since 1937, Ducks Unlimited has conserved and restored more than 15 million acres of the most critical habitat for waterfowl and other wildlife. Ducks Unlimited is proud to count more than 8,000 Montanans in their membership helping accomplish its habitat mission. Wetlands are among the most productive ecosystems on the planet. They are invaluable not only to waterfowl and scores of other wildlife species, but also to the very quality of life on earth.
