Q2

Please comment on Rulemaking - Fisheries ARM Rules that fall within Commission jurisdiction

To the Montana Fish and Wildlife Commission,

I support approval of the Citizen Review Panel's funding recommendations for the Winter 2026 cycle of the Future Fisheries Improvement Program.

FFIP continues to deliver strong habitat outcomes for wild fish while leveraging significant matching funds. For this cycle, the recommended projects generate more than \$2.60 in external contributions for every \$1 of FFIP funding, demonstrating both efficiency and broad partner support.

Approving these recommendations will allow important habitat restoration projects to move forward and continue improving Montana's rivers, streams, and lakes. I support the department's recommendation to approve the FFIP Winter 2026 funding package as presented.

Sincerely,
Mark Fuller
