I strongly oppose every single change proposed by Wargo. Native species should be the priority for fisheries management, these amendments are not science based and would be harmful to native fisheries. Instead of expanding the slot limit on lake trout, it should be eliminated.

Please comment on Wargo Amendment #2

Bull trout fishing in Hungry Horse/South Fork Flathead is under a USFWS 4(d) rule since bull trout are still listed as Threatened. Bull trout spawning counts have declined significantly. If the trend continues, USFWS could close the fishery. FWP wants to maintain bull trout anyway. The late opener in Hungry Horse is designed to allow spawning bull trout to leave the reservoir before harvest stops. Although surface water is warmer then, if bull trout are released carefully they can easily dive to deeper, cooler water. Moving the boundary and a bait ban will require a lot of education.
