

HD 130

The 2005 Elk Management Plan did not establish a population objective for HD 130.

Aerial surveys in HD 130 are not possible due to extensive tree canopy cover.

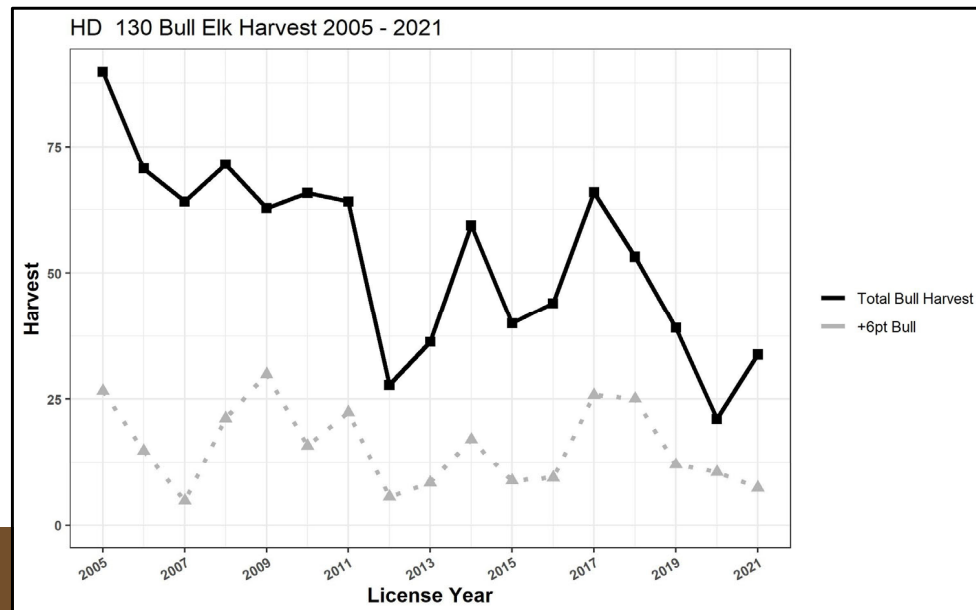

Currently, FWP utilizes bull harvest data, aerial surveys from adjacent hunting districts (HD 140), and public feedback to evaluate elk population trends and make regulation recommendations.

No aerial surveys are conducted for this HD.

HD 130

- Aerial surveys in this hunting district are not possible due to extensive tree canopy cover. Currently, FWP utilizes bull harvest data, survey flight information from adjacent areas in Region 1 when available, and public feedback to evaluate elk population trends and to make regulation recommendations.

HD 130

- Do you think harvest data (above) appropriately represents elk population trend within this HD over time (increasing, stable, decreasing)?
- Are you comfortable with the data Region 1 is currently using?
- Is there other data FWP should use for elk management?
- In HD 130, there is no bull objective. Is this appropriate in this HD? If you would like to have a bull objective, what should it be?
- Are you satisfied with the current elk distribution in this HD? If not, would you suggest any specific objectives to address the distribution?
- What else does the Elk Management Plan need to include for this HD?
