- Commission Rule denoted by CR.
- Administrative rule denoted by ARM.

Aircraft- Unlawful use (MCA 87-6-208)

- It is unlawful for a person to shoot a game animal from an aircraft.
- It is unlawful for a person to use an aircraft for the purpose of concentrating, pursuing, driving, rallying, or stirring up any game animal.
- Aircraft may not be used to locate game animals for the purpose of:
 - hunting those animals during the same hunting day after a person has been airborne; or
 - providing information for another person for the purpose of hunting those animals within the same hunting day after being airborne.

Archery Equipment (MCA 87-6-401, CR)

- It is unlawful to use any chemical or explosive device attached to an arrow to aid in the taking of game animals.
- The following criteria define Archery Equipment. It is unlawful to use, while hunting game during any Archery-only Season and in Archery Equipment Only areas, archery equipment that does not meet the following criteria:

Hunting Bow: A hunting bow for game animals shall be a longbow, flatbow, recurve bow, compound bow, or any combination of these designs.

- The bow must be a device for launching an arrow, which derives its propulsive energy solely from the bending and recovery of two limbs (includes bows with split limbs).
- The bow must be hand drawn by a single and direct uninterrupted pulling action of the shooter. The bowstring must be moved from brace height to the full draw position by the muscle power of the shooter's body. The energy used to propel the arrow shall not be derived from any other source such as hydraulic, pneumatic, mechanical, or similar devices. These limitations shall not exclude the mechanical leverage advantage provided by eccentric wheels or cams, so long as the available energy stored in the bent limbs of the bow is the sole result of a single, continuous, and direct pulling effort by the shooter.
- The bow must be hand-held. One hand shall hold the bow and the other hand draw the bowstring. The bowstring must be moved and/or held at all points in the draw cycle entirely by muscle power of the shooter until release. The bowstring must be released as a direct and conscious action of the shooter, either relaxing the tension of the fingers or triggering the release action of a hand-held release aid.
 - **Exception:** Physically disabled bowhunters certified by FWP with the Permit To Modify Archery Equipment (PTMAE) are exempted from the requirement of holding or shooting the bow with their hands.
- A bow is considered legal if it is at least 28 inches in total length.
- The nominal percent of let-off for hunting bows shall be a maximum of 80 percent as advertised by the manufacturer.

Arrow: An arrow is a projectile at least 20 inches in overall length. The length of the arrow is measured from the rearward point of the nock to the tip of the broadhead.

- A broadhead is mounted on the fore end.
- The arrow shall weigh no less than 300 grains with the broadhead attached.
- Arrows must have broadheads with at least two cutting edges and be at least 7/8 inches at the widest point. Expandable broadheads are legal as long as when expanded they are at least 7/8 inches at the widest point, and weigh no less than 70 grains.

The following are not considered a hunting bow or legal archery equipment during the Archery-only Season or in an Archery Equipment Only area or hunting district:

- crossbow
- any device with a gun-type stock or incorporating any device or mechanism that holds the bowstring at partial or full draw without the shooter's muscle power
- any bow for which a portion of the bow's riser (handle) or any track, trough, channel, or other device that attaches directly to the bow's riser contacts, supports, and/or guides the arrow from a point rearward of the bow's brace height. This is not intended to restrict the use of standard overdraw systems.
- electronic or battery-powered devices attached to a hunting bow

or arrow that aids in the taking or locating of any game animal or game bird. **Exception:** Camera devices attached to bows for the sole purpose of filming are allowed.

- a bow sight or arrow which uses artificial light, luminous chemicals such as tritium, or electronics. **Exception:** an arrow may have a lighted nock.

Artificial Light (MCA 87-6-401)

Dogs (MCA 87-6-404)

It is unlawful for a person to use dogs to chase game animals. Exception: Dogs may be used to hunt mountain lions and spring black bears, see appropriate regulations for rules. Dogs may be utilized to recover or locate wounded game animals, but handlers shall maintain physical control of the dog at all times by means of a maximum 50-foot lead attached to the dog's collar or harness.

Evidence of Sex (MCA 87-6-406)

A person who kills a game animal in this state shall retain evidence of sex of the animal with the carcass until it is processed. The provisions of this section do not apply to a game animal harvested using a license with which either sex of the animal may be taken. Evidence of sex does not need to be naturally attached. A person who kills a game animal in a hunting district where the harvest is limited by the animal's antler point or horn size shall retain the antlers or horns until the carcass is processed.

- While hunting with or training hounds, the dogs must wear tracking collars with the ability to send GPS location information and receive transmissions from hound handler so that the dogs may be electronically recalled and the hound handler's receiver must be able to receive GPS location data from the collars.

- For game animals (excluding mountain lions), all of the four quarters above the hock, including loin and backstrap are considered suitable for food.

Hunter Access

Hunters, it is your responsibility to know where you are, to know who owns the land, and to know what access restrictions apply. Check FWP's website at fwp.mt.gov/hunt/access for information on FWP's Block Management Program.

Fishing Access Sites

Many of Montana's fishing access sites (FAS) offer hunting opportunities, however certain restrictions may apply such as no-hunting safety zones and/or restrictions on the type of hunting weapon or firearm that may be used. Refer to the Fishing Access Site website at myfwp.mt.gov/fishMT/explore for site specific information, opportunities and restrictions.

Federal Land Access

- National Parks Service: National Parks are closed to hunting. For other lands administered by the National Park Service, please contact the specific site managers for additional information.
- National Wildlife Refuges - More restrictive regulations, including species-specific restrictions and closures, may apply to national wildlife refuges open to public hunting. Contact the specific refuge and/or visit fws.gov/refuges for additional information.
- U.S. Forest Service: Area-specific closures or restrictions may apply. Inquire at the appropriate Regional Forest Service Office.

Montana State Parks

Some of Montana's state parks provide hunting opportunities; however, certain restrictions may apply such as no-hunting safety zones and/or restrictions on the type of hunting weapon or firearm that may be used. Contact the specific park and/or refer to the Montana State Parks' website at stateparks.mt.gov for site specific information regarding hunting opportunities and restrictions.

Private Lands- See landowner permission.

Railroad Access

Railroads and railroad rights-of-way are private property and may not be hunted without permission, nor should they be used as access to other lands (private or public) without explicit permission from the railroad.

State Game Preserves- See Restricted Area Descriptions.

State School Trust Lands

Additional information, including closures and restrictions, is available from the DNRC at 406-444-2074

- Overnight use must not exceed the following limits: two consecutive days on leased land, 16 consecutive days within designated campgrounds or on unleased land.
- Motorized travel is only allowed on public roads or on roads designated as open. This restriction applies to all activity including game retrieval.
- Firearms may not be discharged upon trust lands within one-quarter mile of inhabited dwellings or outbuildings on state trust lands without permission of the inhabitant.
- Open fires are prohibited outside of fire pits within designated campgrounds.

State Wildlife Management Areas (WMA)

FWP's WMAs are generally open to hunting during the game animal hunting season. WMAs with big game winter range are closed to public entry, unless otherwise posted, from the day following the end of the general deer-elk season or December 1, whichever is later, to noon on May 15 each year, as posted.

Exception: There are several exceptions to these guidelines. For WMA-specific information, please call the regional office (see page 16 for contact numbers) or visit the FWP website at: fwp.mt.gov/conservation/wildlife-management-areas

Stream Access Law

The Stream Access Law does not allow for the hunting of game animals between the ordinary high water marks of streams and rivers without landowner permission.

Trichinella in Black Bears

Trichinella is a parasite of mammals and some birds. Immature parasites develop cysts in the muscle of the host animal and are transmitted to a new host when infected meat is eaten raw or undercooked. Wild animals rarely show signs of infection. Humans and domestic dogs or cats can become infected with Trichinella by consuming raw or undercooked meat from an infected animal. Symptoms of infection vary and may be severe. All bear and mountain lion meat should be treated as if it were infected. Freezing will not kill the organism; however, cooking at temperatures above 165 degrees Fahrenheit will kill the parasite. Many processing techniques (jerky and smoked meats) may not reach the proper temperature. FWP recommends that all mountain lion and bear meat be well cooked to an internal temperature of 165 degrees before consumption by humans or pets. FWP does not offer Trichinella testing. For further information, call the FWP lab at 406-577-7882.

Mandatory Reporting Requirements

All successful black bear hunters must personally report their black bear harvest within 48 hours.

Successful hunters are required to provide FWP personnel with hunter's name, telephone number, ALS number, Bear Management Unit (BMU), county, sex, and the township range and section (TRS) of the harvest.

Harvest Reporting 1-877-FWPWILD or 1-877-397-9453 or 406-444-0356 or through the MyFWP portal at fwp.mt.gov
Quota Status/Closures..... 800-385-7826 or 406-444-1989
OR on the FWP website..... fwp.mt.gov

The toll-free line and FWP website are updated daily by 1 p.m. MST.

When reporting a black bear harvest, it is unlawful to subscribe to or make any statement that is materially false. Successful hunters in backcountry areas will be allowed to report a black bear harvest within 48 hours of reaching a trailhead.

NOTE: In BMUs 510, 520, 600 and 700 when the quota is reached or approached in each of these districts, the black bear season in that district will close. For quota status call 1-800-385-7826 or (406) 444-1989.

Inspection Requirements Region 1 Only:

For black bears harvested within Region 1, physical inspection of a harvested black bear is not required. Successful Region 1 hunters must submit a premolar tooth from harvested black bears and deliver them to a FWP office within 10 days, either in person or by mail (postmarked within 10 days). See page 10 for more information.

Inspection Requirements Regions 2-7:

Within 10 days of harvesting a black bear, the successful hunter must present to a Montana FWP official the complete bear hide and skull for the purpose of inspection, tagging and possible removal of a tooth (for aging). The hide and skull must be presented in a condition that allows full inspection and tooth collection (i.e., unfrozen). Any hide or skull not presented or registered to FWP personnel within 10 days of harvest is subject to confiscation.

A person licensed to hunt and authorized to possess a carcass of a black bear that requires mandatory department biological inspection may, after validating and attaching the license or tag in accordance with 87-6-411, transfer possession of all or part of that black bear to any person at any time after leaving the site of the kill, provided a statement of possession has been completed. The statement of possession must be on a form prescribed by the department and signed by the licensed person and the person or persons receiving possession, and must accompany the carcass or portion of carcass presented for inspection.

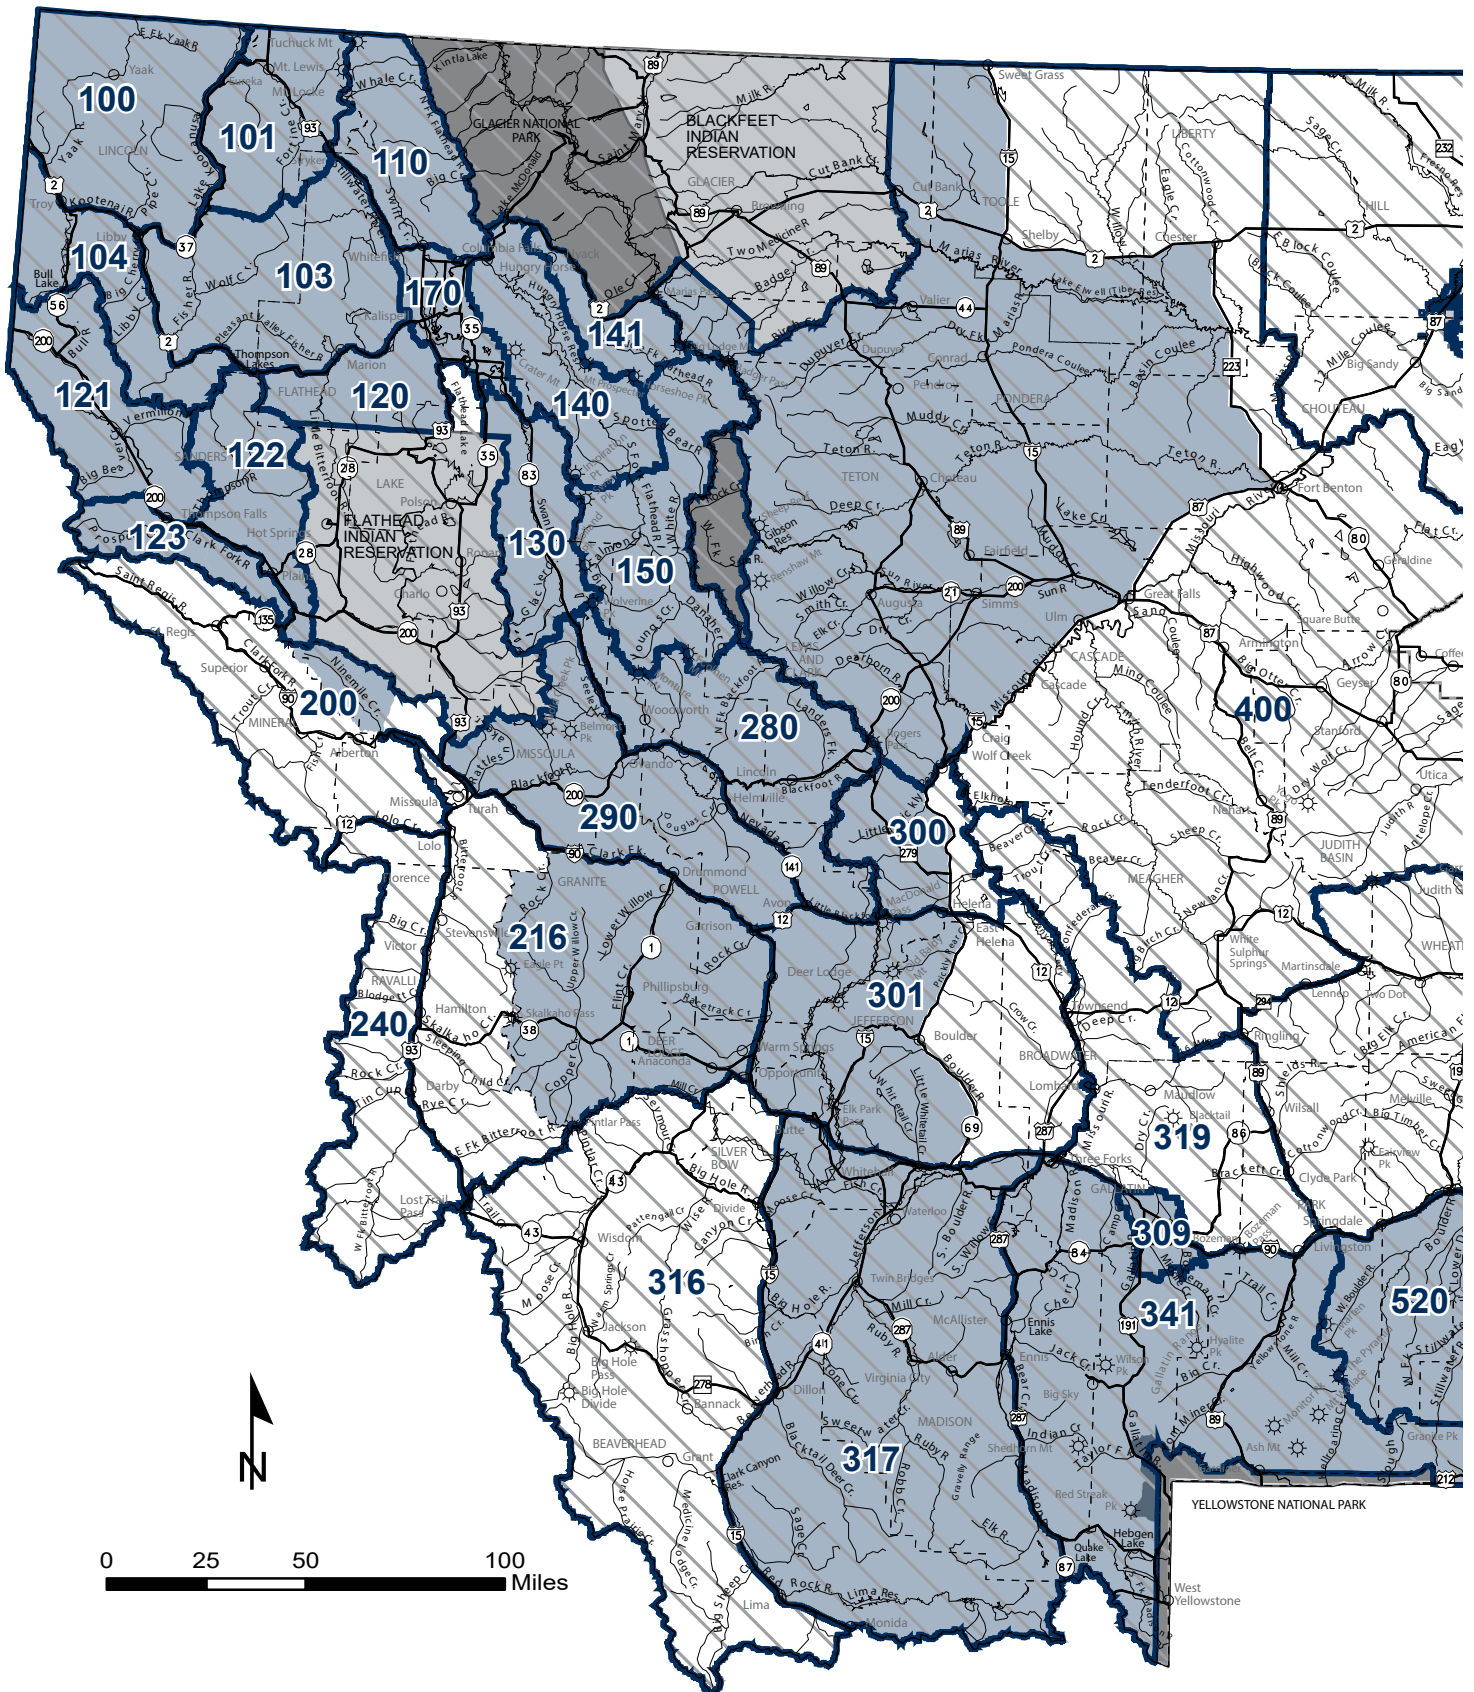

The statement of possession form can be found here: <https://fwp.mt.gov/binaries/content/assets/fwp/hunt/forms/transfer-of-game-animal-or-wolf.pdf>

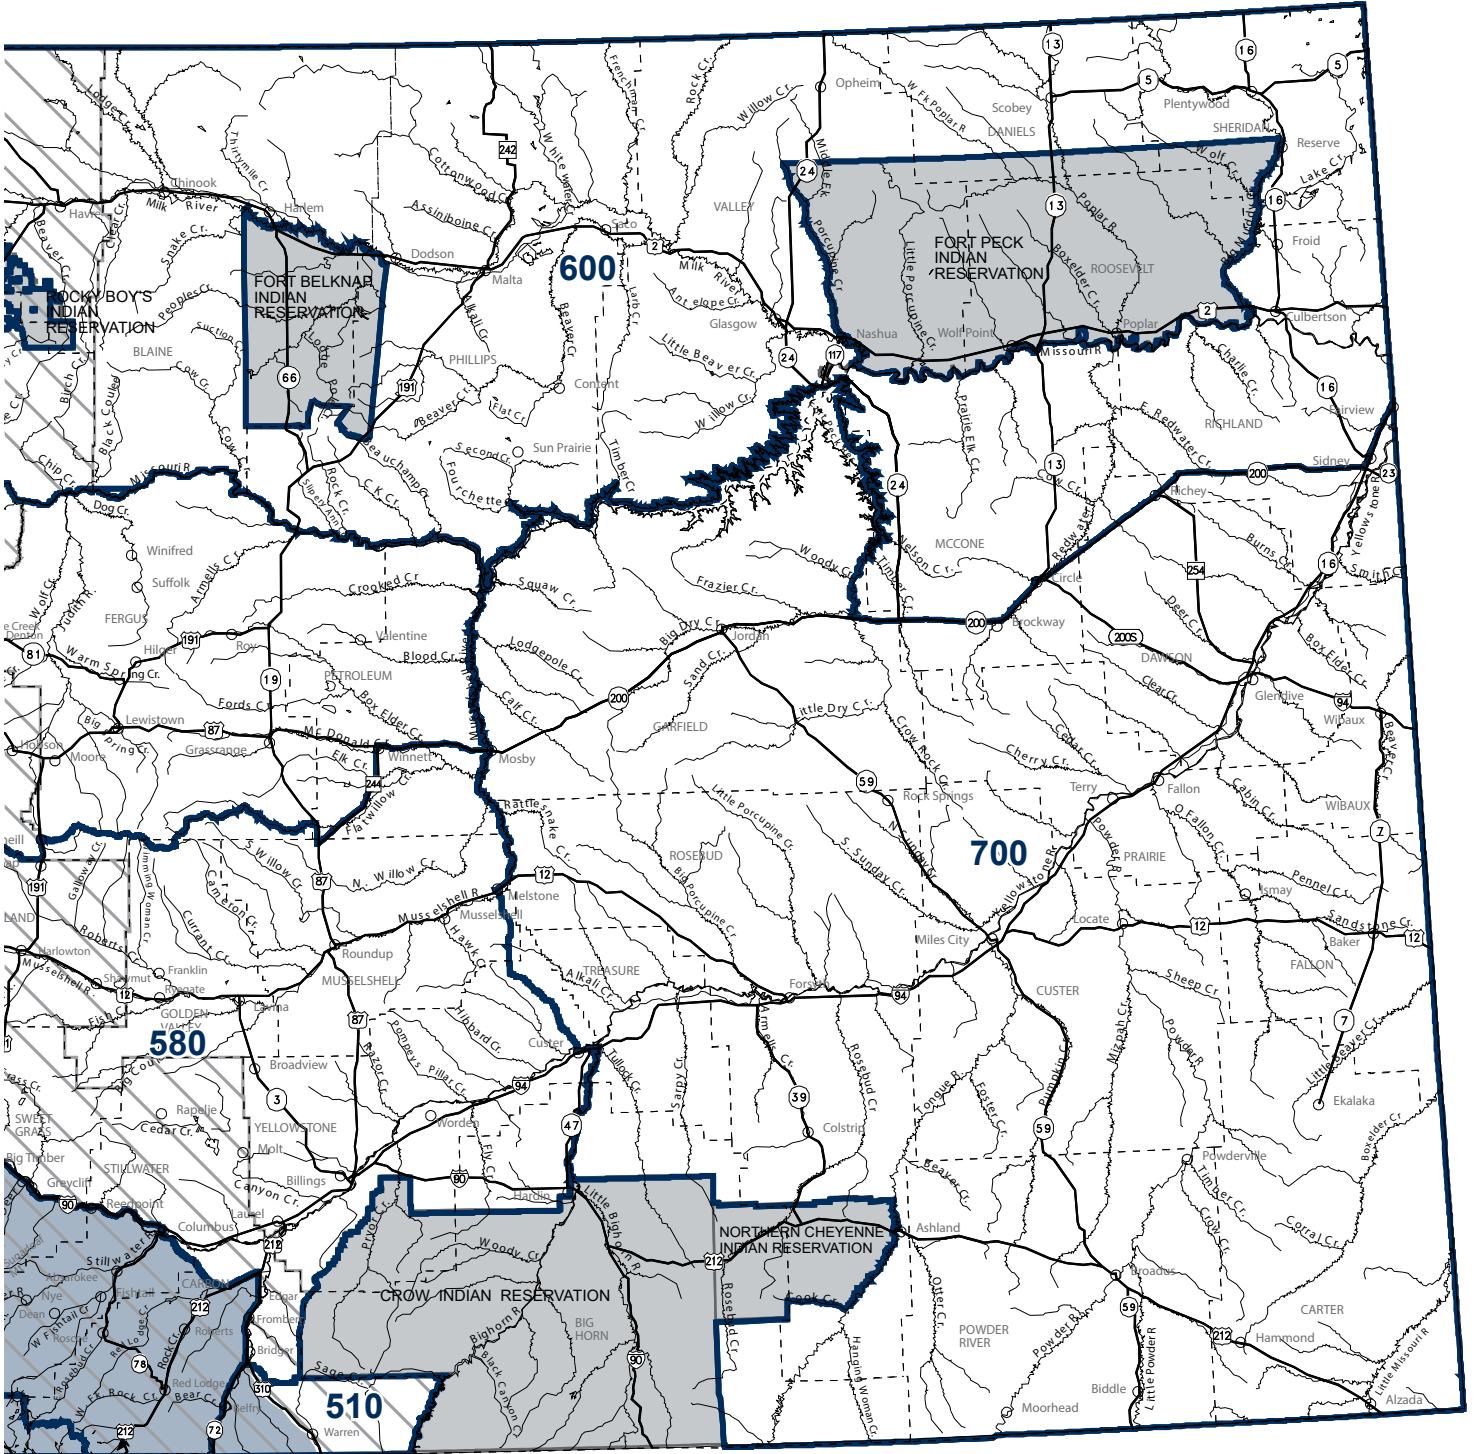

REMINDER: The hunter must still personally report their harvest by phone or through MyFWP as required even if a transfer form is completed.

- It is unlawful for anyone to possess, ship, transport, sell, or purchase any black bear harvested in Montana, or part thereof, unless the animal has been tagged as prescribed.

Region 1 Specific Inspection Requirements

All successful black bear hunters must personally report their black bear harvest within 48 hours.

Physical inspection of a black bear harvested in Region 1 is no longer required. However, mandatory 48 hour reporting of any successful black bear harvest is required. In addition, successful hunters are required to submit one premolar tooth from any black bear harvested in Region 1 within 10 days of harvest. Teeth can be submitted in person or by mail (post-marked within 10 days).

Please include the following information with the tooth: Hunter name, reference number received from the Harvest Reporting line or MyFWP portal, date of harvest, BMU and sex of bear. Wrap the tooth in a paper towel and place inside a plastic bag. Place plastic bag containing the tooth and data sheet in an envelope and include your return address.

Mail teeth to: FWP R1 Headquarters,
490 North Meridian, Kalispell, MT, 59901

Or drop off at any FWP Regional office or the Thompson Falls and Libby area offices.

Please contact your local biologist or call 406-752-5501 if you have questions.

The graphic below depicts which tooth to remove. You must carefully extract a tooth in its entirety as the root is needed to accurately determine age. Extracted teeth should look like the tooth circled in the illustration below. Age information will be posted online and available at MyFWP. Lab results for aging teeth typically takes 8 months or more.

A tooth submission form and additional information on how to pull and submit teeth can be found on the fwp.mt.gov website under hunting and hunt by species-black bear or by clicking here.

Instructions and data forms can also be obtained at the FWP offices Kalispell, Libby and Thompson Falls.

Carry Bear Spray and Know How To Use It!

- Hunting puts you at risk of encountering a bear. Calling game and using scents may attract bears.
- If you hunt alone, let someone know about your plans. If you feel uneasy hunting alone, hunt with a partner.
- Bears are opportunists and change their behavior to take advantage of new food sources. Always assume that grizzlies are in the area and make sure your camps, cabins, and homes are bear proof, and that bear attractants are unavailable or contained.
- Mentally rehearse a worst-case scenario with encountering a bear. "If the mind has never been there before, the body does not know how to respond."
- To minimize the likelihood of attack or chances of human injury, make certain you have bear spray at the ready and know how to use it. In sudden grizzly encounters, bear spray has proven effective. Bears sprayed in the face at close range often stop attacking. Always maintain a safe distance from bears.
- Report encounters with grizzly bears to FWP at 1-800-TIP-MONT, U.S. Forest Service, or one of the nearest FWP bear management specialists listed below:
