

Is the pond or lake created by artificial impoundment of water? Yes

Describe water source: runoff from rain or snow events

List any fish species present: none

How is the pond constructed? _____ Excavated X Dam _____ Other

Does the pond include any portion of a natural stream or lake? Ephemeral stream only

Describe dam and outlet structure, if any:

Have screens been provided: no on diversion inlet? no on pond outlet?

Describe discharge of pond water to nearest stream or lake, if any: standard earth spillway into unnamed creek for 0.4 creek miles then into Mile Creek at creek mile 6.2 before merging with O'Fallon Creek at river mile 106.1.

Fish species present in nearby stream/lake? The following nine fish species in O'Fallon Creek 6/16/2004 at river mile 110.5: black bullhead, brassy minnow, common carp, creek chub, fathead minnow, green sunfish, plains killifish, sand shiner, white sucker

Likelihood of fish escaping from pond? Minimal, not likely to reach water in O'Fallon Creek located 6.6 creek miles downstream of dam.

Give name of any person(s) who accompanied you during inspection: desktop, database and satellite imagery review only.

Do you recommend that a private pond license is granted? X Yes _____ No

List reasons:

Region: 7

GPS location (Decimal Degrees) -- Latitude: 46.19853 Longitude: -104.81595
