

SPA 124 PERMIT DECISION NOTICE

Fish Creek Road Maintenance and Improvements
SPA 124 Permit Application – Lolo National Forest

May 9, 2024

ACTION

Decision Notice (DN). Montana Fish, Wildlife & Parks (FWP) shall prepare a DN for the proposed action. The DN must identify the agency decision, the reasons for the decision, and any special conditions surrounding the decision or its implementation. With this action, FWP hereby adopts the Draft Environmental Assessment or Draft EA prepared for the proposed action as final, and approves Alternative 2, the proposed action.

AUTHORITY: MONTANA ENVIRONMENTAL POLICY ACT

According to the applicable requirements of the Montana Environmental Policy Act or MEPA and its implementing rules and regulations, before a proposed action may be approved, environmental review must be conducted to identify, consider, and disclose any potential impacts of the proposed action on the affected human environment. The level of environmental review will vary with the complexity and seriousness of environmental issues associated with a proposed action. The level of public interest will also vary. The agency is responsible for adjusting public review to match these factors. *Title 75, Chapter 1, Parts 1 through 3, Montana Code Annotated (MCA)*. Based on these factors, FWP determined a Checklist EA (Draft EA) constitutes the appropriate level of review for the proposed action. Therefore, to assess and disclose potential impacts of the proposed action, FWP prepared a Draft EA.

PUBLIC PARTICIPATION PROCESS

Under usual circumstances, FWP makes the Draft EA available for public review and comment. However, in this circumstance, MEPA's required public process for projects of this nature is impacted by a competing statutory deadline. MEPA requires FWP to comply with its terms "*to the fullest extent possible*." To fulfill the stated policy of MEPA, the agency shall conform to the applicable rules prior to reaching a final decision on proposed actions covered by MEPA. *ARM 12.2.428, Policy Statement Concerning MEPA Rules*. More specifically, § 87-5-504, *MCA*, states:

"Within 30 days after the receipt of such plans [for a project subject to SPA 124 permitting], the department shall notify the applicant whether or not such construction project or hydraulic project will adversely affect any fish or game habitat. If the department notifies the applicant that such construction will adversely affect any fish or game habitat, it shall accompany such notice with recommendations or alternative plans which will eliminate or diminish such adverse effect."

Effectively, within 30 days after receipt of an application [for an SPA 124 Permit], FWP must make a final decision on the proposed action/project. Within the applicable 30-day timeframe, the MEPA practitioner or author of the Draft EA must conduct a rigorous process, making it difficult or impossible for FWP to accommodate a public comment period for the Draft EA within the required 30-day time-period. § 87-5-504, MCA.

Therefore, for the purposes of achieving compliance with MEPA, *“to the fullest extent possible,”* FWP prepares a Draft EA for file, sans public comment, and issues a DN identifying the agency decision, reasons for the decision, and any special conditions surrounding the decision or its implementation. Conditions applicable to the approved action, including recommendations or alternative plans to eliminate or diminish any adverse effects, are contained in the approved SPA 124 Permit (see attached).

DESCRIPTION OF PROPOSED ACTION

SPA-124 Permit Review – Lolo National Forest – Repair and Maintenance of Fish Creek Road

This project involves a stream permitting application associated with road maintenance and improvements along USFS Road 343 where work lies adjacent to main stem Fish Creek. Project components involve installation and repair of various relief culverts, bioengineered riprap and French drain work at MP 8.3, and stream bank work associated with road relocation at MP 13.4. This project is proposed by the Lolo National Forest, who maintains Rd 343 across various ownerships, as part of routine, ongoing efforts to ensure public access and road functionality.

PURPOSE AND NEED

The proposed project will protect and enhance the existing road (USFS 343) by (1) adding gravel and improved drainage in various locations and (2) reducing road-stream interactions by re-aligning road segments further from the stream and installing bioengineered riprap at two locations where the stream is eroding into the road prism. Work to alleviate the issue is planned for spring/summer 2024 as part of the larger Road 343 enhancement project.

ALTERNATIVES ANALYZED

Alternative 1: No Action

In addition to the proposed action, and as required by MEPA, FWP analyzes the "No-Action" alternative in the EA. Under the No-Action alternative, the proposed action would not occur. Therefore, no additional impacts to the human environment would occur. The No Action alternative forms the baseline from which the potential impacts of the proposed action may be measured.

If the No Action alternative is selected, FWP would not issue an SPA-124 permit and identified road and stream bank work would not occur. This would allow continued water quality impacts and further erosion into the road prism at the project locations, ultimately threatening viability of the road and public access.

Alternative 2: Proposed Action

Under the Proposed Action, FWP would issue a SPA 124 permit and the project would be completed following standard and special conditions provided in the SPA 124 permit. Special conditions required include:

- 1) Work on immediate stream banks and within Fish Creek that generates turbidity may only occur between July 15 and Sept 1.

DECISION

Based on the environmental review provided in the Draft EA, and, to the greatest extent possible, in accordance with all applicable laws, rules, regulations, and policies, FWP determined the proposed action (Alternative 2) will not have significant adverse impacts on the human environment and constitutes a reasonable and appropriate strategy to achieve identified objectives. Therefore, preparation of an environmental impact statement or EIS is unnecessary. The project will allow the Lolo National Forest to complete road maintenance and improvements on Road 343 along Fish Creek.

FWP hereby adopts the Draft EA as final and approves Alternative 2, the Proposed Action.

Sincerely,

A handwritten signature in blue ink that reads "Kendra McKlosky". The signature is written in a cursive style with a large, looping "K" and a long, sweeping underline that extends under the word "McKlosky".
