

## DECISION NOTICE

### Holtan Reservoir Yellow Perch Introduction

FWP-DN-FSH-R6-24-05

4/30/2024

#### **ACTION**

Decision Notice (DN). Montana Fish, Wildlife & Parks (FWP) shall prepare a DN for the proposed action. The DN must identify the agency decision, the reasons for the decision, and any special conditions surrounding the decision or its implementation.

With this action, FWP hereby adopts the Draft Environmental Assessment or Draft EA as final and approves Alternative 2, the proposed action.

#### **AUTHORITY: MONTANA ENVIRONMENTAL POLICY ACT**

According to the applicable requirements of the Montana Environmental Policy Act or MEPA and its implementing rules and regulations, before a proposed action may be approved, environmental review must be conducted to identify, consider, and disclose any potential impacts of the proposed action on the affected human environment. The level of environmental review will vary with the complexity and seriousness of environmental issues associated with a proposed action. The level of public interest will also vary. The agency is responsible for adjusting public review to match these factors. *Title 75, Chapter 1, Parts 1 through 3, Montana Code Annotated (MCA)*.

Based on these factors, FWP determined a CHECKLIST EA (Draft EA) constitutes the appropriate level of review for the proposed action. Therefore, to assess and disclose potential impacts of the proposed action, FWP prepared a Draft EA for public review and comment. See *Public Participation Process* below.

Further, FWP must consider any substantive comments received in response to an EA and proceed in accordance with one of the following steps: determine the EA did not adequately reflect the issues raised by the proposed action and issue an Environmental Impact Statement or EIS; determine the EA did not adequately reflect the issues raised by the proposed action and issue a supplemental EA; or determine the Draft EA adequately addressed the issues raised by the proposed action and make a final decision, with appropriate modification resulting from the analysis provided in the Draft EA and the analysis of any substantive public comments received. See *Public Comment and FWP Response* below.

#### **PUBLIC PARTICIPATION PROCESS**

The Draft EA was made available for public review and comment from April 15, 2024 – April 30, 2024. The

Draft EA was posted on FWP's Public Notice webpage: <https://fwp.mt.gov/news/public-notice>. The Draft EA was also made available for public review on the Environmental Quality Council or EQC website: <https://leg.mt.gov/mepa/search/>, by individual request, and through notice to identified interested parties. FWP did not receive comments during the public comment period.

### **DESCRIPTION OF PROPOSED ACTION**

Montana Fish, Wildlife and Parks (FWP) is proposing to transfer yellow perch from disease and AIS tested donor waters within FWP Region 6 into Holtan Reservoir in Sheridan County, MT. Holtan Reservoir is a 4.2-acre reservoir containing brook stickleback, fathead minnows, and rainbow trout. Holtan Reservoir is located on private property owned by Doug Fawcett, but open to public angling. Fisheries resources are managed by FWP.

The proposed project would increase angling opportunity by creating an additional fishing opportunity for recreational anglers. The proposed project would take place in spring 2024.

### **PURPOSE AND NEED**

The proposed project will increase angling opportunity at an important, publicly accessible fishing location near Outlook, MT. Yellow Perch will provide anglers additional species to target, in addition to rainbow trout. Diversifying species within Holtan Reservoir will benefit angling success through increased catch rates, as yellow perch tend to have high catchability.

### **ALTERNATIVES ANALYZED**

#### **Alternative 1: No Action**

In addition to the proposed action, and as required by MEPA, FWP analyzes the "No-Action" alternative in the EA. Under the No-Action alternative, the proposed action would not occur. Therefore, no additional impacts to the human environment would occur. The No Action alternative forms the baseline from which the potential impacts of the proposed action may be measured.

#### **Alternative 2: Proposed Action**

Under the Proposed Action, FWP transfer Yellow Perch from AIS/disease free donor waters into Holtan Reservoir in 2024.

### **PUBLIC COMMENT AND FWP RESPONSE**

No public comments were received during the public comment period.

### **DECISION**

Based on the environmental review provided in the Draft EA, and in accordance with all applicable laws, rules, regulations, and policies, FWP determined the proposed action (Alternative 2), will not have significant adverse impacts on the human environment associated with the proposed action and constitutes a reasonable and appropriate strategy to achieve identified objectives. Therefore, preparation of an EIS is unnecessary. FWP hereby adopts the Draft EA as final and approves the Alternative 2, the proposed action.

With this DN, FWP hereby adopts the Final EA and approves the proposed action.

Sincerely,

A handwritten signature in blue ink, appearing to read "Drew Henry". The signature is fluid and cursive, with the first name "Drew" and the last name "Henry" clearly distinguishable.
